Office of the Editor: Tulegatan 41, P.O. Box 19 111, S-104 32 Stockholm 19

Contents

Volume 24, 1972

NUMBER 1

T. J. Simons and D. B. Rao: Nonlinear interaction of waves and zonal current in a two-layer baroclinic model 1

H. Sundqvist: Model tropical cyclone behaviour in experiments related to modification attempts 6

W. Schwerdtfeger: The vertical variation of the wind through the friction-layer over the Greenland ice cap 13

G. Kullenberg: Apparent horizontal diffusion in stratified vertical shear flow 17

Y. Ikebe and M. Shimo: Estimation of the vertical turbulent diffusivity from thoron profiles 29

A. Marenco and J. Fontan: Sources of Polonium-210 within the troposphere 38

G. Hunt: Photochemical heating of the mesosphere and lower thermosphere 47

S. Rangarajan: Wavelength exponent for haze scattering in the tropics as determined by photoelectric photometers 56

H. C. Noltimier: Numerical evaluation of the scatter of principal magnetic susceptibilities from the uncertainties in experimental measurements 65

NUMBER 2

V. P. Starr and R. D. Rosen: A variance analysis of angular momentum in stellar and planetary atmospheres 73

R. Long: The steepening of long, internal waves 88

A. Kasahara and D. Williamson: Evaluation of tropical wind and reference pressure measurements: Numerical experiments for observing systems 100

K. Fraedrich: On the evaporation from a lake in warm and dry environment 116

E. S. Selezneva: Estimation of the background contamination of the atmosphere from the chemical composition of precipitation 122

H. Rodhe: A study of sulfur budget for the atmosphere over northern Europe 128

R. F. Pueschel and B. G. Mendonca: Sources of atmospheric particulate matter on Hawaii 139

A. S. Ramachandra Murty and Bh. V. Ramana Murty: Freezing characteristics of rain water drops with different solutes and their implication on anomalous ice crystal concentrations in clouds 150

Shorter Contributions

J. C. J. Nihoul: On the energy spectra of a random field of internal waves 161

C. B. Fandry and L. M. Leslie: A note on the effect of latitudinally varying bottom topography on the wind-driven ocean circulation 164

NUMBER 3

G. Walin: On the hydrographic response to transient meteorological disturbances 169

G. Walin: Some observations of temperature fluctuations in the coastal region of the Baltic 187

H.-O. Kreiss and J. Oliger: Comparison of accurate methods for the integration of hyperbolic equations 199

Y. Lin and D. E. Martin: Further study of a steady severe model storm with rotating updraft configuration 216

S. Chandra: Some features of instantaneous point source diffusion with a turbulent boundary layer 230

W. Zdunkowski and N. D. Mcquage: Short term effects of aerosols on the air layer near the ground 237

D. L. Mcnaughton and P. Wurzel: Tritium in rain as an indicator of airmass source 255

S. E. Tuller: Energy balance microclimatic variations on a coastal beach 260

S. Heitz and C. C. Tscherning: Comparison of two methods of astrogeodetic geoid determinations based on least squares prediction and collocation 271

Shorter Contribution

B. B. Hicks: Radioactive fallout in rain at Melbourne 1958 through 1970 277

NUMBER 4

K. Stewartson: A spectrum, continuous in discrete intervals, for trapped oscillations 283

L. H. Steinberg: On the power law for the kinetic energy spectrum of large scale atmospheric flow 288

C.-M. Tang: On the instability of a three-layer atmosphere with an isentropic stratosphere 293

B. Auvine and C. E. Anderson: The use of cumulonimbus anvil growth data for inferences about the circulation in thunderstorms and severe local storms 300

L. Berkofsky: Tropospheric wave motions with baroclinic basic flow in equatorial latitudes 312

J. Egger: Incorporation of steep mountains into numerical forecasting models 324

J. Namias: Influence of northern hemisphere general circulation on drought in northeast Brazil 336

B. Saint-Guily: On the response of the ocean to impulse 344

C. Wunsch: Temperature microstructure on the Bermuda slope with application to the mean flow 350

S. Israelsson, E. Knudsen, E. Ungethüm and L. Dahlgren: On the natural α-activity of the air near the ground. Method of measuring and a few preliminary results 368

Note

B. R. D. Gupta: Periodicity in the average daily strength of Siberian anticyclone during November 1967 to April 1968 380

NUMBER 5

L. Bengtsson and N. Gustafsson: Assimilation of non-synoptic observations 383

D. N. Sikdar: ATS-3 observed cloud brightness field related to meso – to subsynoptic scale rainfall pattern 400

G. S. Janowitz: The effect of finite vertical Ekman number on the coastal boundary layers of a lake 414

I. L. Karol and L. T. Myatch: Contribution to the planning of the station network for measuring the chemical composition of precipitation 421

A. Marenco and J. Fontan: Étude par simulation sur modèles numériques du temps de séjour des aérosols dans la troposphère 428

H. Rodhe and J. Grandell: On the removal time of aerosol particles from the atmosphere by precipitation scavenging 442

H. Bultynck and L. M. Malet: Evaluation of atmospheric dilution factors for effluents diffused from an elevated continuous point source 455

B. A. Bodhaine: The effects of ammonia on the electrification of freezing and splashing water drops 473

A. Bjerhammar: A determination of the velocity of light using the twin superheterodyne principle 481

Letter to the Editor

G. Assaf: On the estimation of vertical turbulent diffusion from thoron profiles 496

Erratum 497

NUMBER 6

G. P. Kurbatkin: Ultralong atmospheric waves and a long-range forecasting 499

J. M. Lewis: An operational upper air analysis using the variational method 514

A. H. Murphy: Ordinal relationships between measures of the "accuracy" and "value" of probability forecasts: preliminary results 531

M. Rahmatullah: A comparative study of the wind structure in the stratosphere at Sonmiani vis-a-vis CIRA 1965 543

L. Granat: On the relation between pH and the chemical composition in atmospheric precipitation 550

E. Wirth and F. Prodi: The concentration and size distribution of airborne ferromagnetic particles 561

F. Prodi and E. Wirth: Ferromagnetic particles and ice nuclei 568

R. K. Kapoor, L. T. Khemani and Bh. V. Ramana Murty: Chemical composition of rain water and vain characteristics at Delhi II 575

A. S. Ramachandra Murty and Bh. V. Ramana Murty: Ice nucleation by ordinary portland cement 581

N.-A. Mörner: Isostacy, eustacy and crustal sensivity 586

Shorter Contribution

S. J. Reid: An observational study of the waves using radiosonde data 593

Letter to the Editor

A. Ångström: Turbidity of the atmosphere over India 597
